SIMPSON'S GRASS SEED

MERION Bluegrass Formula (contains 28% Merion, balance Chewing Fescue and Highland Bent) — After twelve years of testing Merion Bluegrass has shown a marked superiority over ordinary bluegrasses, in resistance to leafspot, and weed invasion and more tolerance to heat and drought. Has better turf quality and appearance, also can be mowed closer than common bluegrass. Sow about 5 pounds to 1,000 sq. ft. **1 lb. \$3.75; 3 lbs. \$11.00; 5 lbs. \$17.50; 10 lbs. \$33.00. (Not postpaid.)**

Lawn Grass Seeds

Making a lawn is a job that most of us only have to undertake once or twice in a life-time. We build lawns for permanence, and for that reason we **SHOULD** go about it with the utmost care. The soil should be carefully prepared before planting the seed.

It requires about 10 pounds of Blue Grass seed to 1,000 square feet (Bent seed about 5 pounds). Fertilize with a good commercial fertilizer such as Vigoro, Ivy, Milorganite or Loma, using 100 pounds to 2,500 square feet and cover with Peat Moss. (1 bale covers about 1,000 square feet.)

SHEEP MANURE is very good, as it contains some **HUMUS** and is especially good to mix in your vegetable garden soil. 100 pounds covers about 500 square feet. You can make a good liquid manure by mixing one pound of Sheep Manure with five gallons of water.

We are always pleased to help you with your lawn problems.

These prices are **NOT PREPAID**. If wanted by mail, include postage at the regular zone rates. **NO SALES TAX ON SEEDS.**

CULTURE. One ounce of seed should produce about 3,000 plants. For early Cabbage sow the seed in a hotbed in March or April, covering the seed from one-quarter to one-half inch deep and when big enough transplant to another bed. As soon as the ground is in good condition, transplant outside in rows 2 feet apart and 15 to 18 inches in a row. The soil should be mellow, rich and well drained. For late crops the seed can be sown in a cold frame or even in the open ground, and then transplanted in rows 3 feet one way and 2 feet the other.

The Ten **BEST ROSES OF ALL TIME...**

For those who want the very best we repeat this group of leading All-America Rose Selections. These magnificent roses have been elected to the horticultural Hall of Fame by the country's leading experts on the basis of their performance in America's gardens.

Only thirty-four roses of the hundreds of new varieties developed between 1940 and 1950 have been able to qualify for the A.A.R.S. award, and from this number the Top Ten were chosen in 1951. All-America awards are given only after two years of intensive testing in official test gardens located throughout the country. There are three A.A.R.S. winners for 1952. See back cover page.

KITTY LITTER?

Kitty Litter is a specially processed material which provides a new and better solution to a problem confronted by owners of cats. It does away with the daily, unpleasant "messy sand box routine." Unlike sand, it dries and deodorizes.

You will find it much more economical to use than sand; it need not be changed every day, so you will find it substantially lower in cost. We suggest a Kitty box or pan 15 or 16 inches in diameter. At the end of every other day you will see that the droppings have dried so thoroughly that they can be removed with a Kitty Litter Scoop and disposed of easily. 5 lbs. 70c; 10 lbs. \$1.30; 25 lbs. \$3.00; 5 lbs. \$5.50.
